ABOUT

I develop websites and web applications using my front and back end skills. When dealing with a project I pay attention to the smallest details addressing problems with patience. In addition to my knowledge base, I actively seek out new technologies and stay up-to-date on industry trends and advancements.

EXPERIENCE

2015-2018

Agminen - Full-Stack Developer

- Front end development using HTML, CSS, Javascript, Angular.js, React.js.
- Backend development using Node.js, Express.js.
- Database technologies like MySQL, PostgreSQL, and MongoDB.
- Worked closely with the designer. Converted Photoshop files to HTML, CSS & Javascript.
- iOS & Android app development using React & React Native.
- Mobile applications feature updates and bug fixes. Update Playstore & App store with new builds.

EDUCATION

2015-2018

System Analyst

National University Of La Plata

PERSONAL PROJECT

Developer Social Network

A MERN Stack App based on Facebook and LinkedIn, built from the scratch using Express.js, Node.js and MongoDB for the Backend and React.js for the Frontend.
